6 SECRET EFFECTS CODES FOR CLAUDE CODE

PLUS 194 MORE: 200 CODES IN ALL

Upload your video into Claude Code, type one code and Claude puts the effect on your actual clip: glass panels floating around you, your thumbnails spinning around your head, a spotlight, a to-do list that ticks off as you talk, match cuts and iPhone-style switches. It's a free skill you install with one message. Here are the six codes from my video, how to install it, and 194 more codes to try.

The 6 codes from my video, word for word

Install the free /effects skill with one message

Exactly how to use it on your own video

194 more effects codes, sorted by type

Fixes if something doesn't work

November 2026

Start Here: The 6 Codes From My Video

THE PLAN

1. Install the free /effects skill in Claude Code with one message.
2. Put your video in a folder and open Claude Code there.
3. Type a code. Get back your video with the effect on it.

Before you start

Your setup: Claude Code on a computer: the Code tab in the Claude desktop app, or claude in a terminal. Claude Code needs a paid Claude plan (Pro or higher).

Your computer: A Mac or Windows PC with Python 3 and Google Chrome. Claude installs the rest the first time.

Your video: A clip of you talking, 3 to 15 seconds works best. MP4 or MOV.

Type /effects, then the code. That's it.

Type this	You get
/effects glass-widgets	Floating glass panels all around you
/effects orbit	Your video thumbnails spin around your head
/effects spotlight	Darkens your background and keeps you lit
/effects to-do	A checklist next to you that ticks off as you speak
/effects match-cut	Fast cuts between news pages with the same word locked in place
/effects apple-toggles	iPhone-style switches right under your head

You get back your own video, same sound, with the effect on it: a vertical MP4 ready for Reels and TikTok. Nothing gets uploaded anywhere. Claude makes it on your computer.

Copy This First: Install /effects

Open Claude Code (the Code tab in the Claude desktop app, or type claude in a terminal), paste this and send it:

PROMPT 1 | COPY & PASTE

```
Install the effects skill from https://github.com/maverickmaltin/claude-effects-skill
into my ~/.claude/skills folder.
```

Then start a new session and type /effects. If you see it in the list, you're set.

TIP

The first time you use it, Claude checks your computer and installs the free tools it needs: one to record the effect, one to save the video, one that cuts you out of your background (so things can go behind you) and one that listens to your words (for the to-do list). Say yes when it asks.

HEADS UP

This is made for Claude Code on a computer, where it makes the real video. It won't work in the Claude app on the web or your phone.

Rather install it by hand?

- **Download it:** effects.zip.
- **Unzip it** and move the effects folder into **~/.claude/skills** on a Mac (your home folder, then .claude, then skills), or **C:\Users\[YOU]\.claude\skills** on Windows. Create the skills folder if it isn't there.
- **Start a new session** in Claude Code.

Step 1: Put an Effect on Your Video

- **Make a folder** with your video in it.
- **Open Claude Code in that folder.** In the desktop app's Code tab, pick the folder when you start the session. In a terminal, go to the folder and type claude.
- **Type the code and send it.** For example, /effects spotlight. Claude finds your video, checks one frame, and saves the finished video next to the original, named after the code. It takes about a minute for a 10-second clip.

Want all six at once? Paste this:

ALL PROMPTS | COPY & PASTE

```
Make six versions of my video, one for each of these: /effects glass-widgets, /effects orbit, /effects spotlight, /effects to-do, /effects match-cut, /effects apple-toggles
```

Make it yours

Add a note after any code and Claude follows it:

- /effects spotlight word: MONEY (a neon word glows behind you)
- /effects orbit use the photos in my thumbnails folder
- /effects to-do only from 0:02 to 0:08
- /effects glass-widgets my name is [YOUR NAME], @[YOUR HANDLE]
- /effects match-cut word: [YOUR WORD]

TIP

Any look stacks on any code. Try /effects orbit look-film or /effects to-do look-warm.

194 More Effects Codes

Every code works the same way: /effects plus the code, on the video in your folder. Some use your own details (your numbers, your photos, a real review): Claude asks for them and never makes them up. Looking for one from a video? Press Ctrl+F (Cmd+F on a Mac) and type it in.

Glass and widgets (24)

Type this	You get
/effects glass-stats	Glass cards with your real numbers around you
/effects glass-weather	A glass weather widget next to your head
/effects glass-music	A now-playing card floating beside you
/effects glass-notifications	Notifications pop in around you as you talk
/effects glass-calendar	A glass calendar card with your plan for the day
/effects glass-dark	The glass widgets in dark mode
/effects glass-profile	Your name and handle on a glass card
/effects glass-clock	A big glass clock beside you
/effects glass-quote	Your best line on a glass card
/effects glass-progress	A glass progress bar that fills as the video plays
/effects glass-chart	A glass bar chart that builds next to you
/effects glass-likes	A glass like counter with a heart
/effects glass-dm	A glass DM bubble pops in next to you
/effects glass-sticky	Your key point on a glass sticky note
/effects glass-badge	Just the "Edited by Claude" glass pill under you
/effects glass-name-tag	A glass name tag with your name and what you do
/effects glass-countdown	A glass card counting down
/effects glass-timer	A glass stopwatch counting up
/effects glass-poll	A glass poll card with two bars filling
/effects glass-review	A glass 5-star review card
/effects glass-price	A glass price tag next to you
/effects glass-weekly	Glass widgets for your week: steps, sleep, screen time
/effects glass-stack	Glass cards stack up one by one as you talk
/effects glass-minimal	One clean glass card, nothing else

Things around you (22)

Type this	You get
/effects orbit-photos	Your photos circle your head
/effects orbit-logos	Logos circle your head
/effects orbit-fast	The orbit, twice as fast
/effects orbit-slow	A slow, dreamy orbit
/effects orbit-reverse	The orbit spins the other way
/effects orbit-big	Fewer, bigger cards
/effects orbit-ring	A tight ring of 12 small cards
/effects orbit-chest	The ring circles at chest height
/effects orbit-emojis	Emojis circle your head
/effects orbit-words	Key words from your video circle you
/effects orbit-products	Your product photos circle you
/effects orbit-planets	Little planets circle your head
/effects orbit-tilted	The ring tilts like Saturn's rings
/effects float-up	Your thumbnails float up behind you
/effects rain-cards	Cards fall like rain behind you
/effects halo	A glowing ring floats above your head
/effects sparkles	Sparkles twinkle around you
/effects hearts	Hearts float up around you
/effects money-rain	Money falls behind you
/effects confetti	Confetti bursts behind you
/effects bubbles	Chat bubbles pop up around your head
/effects app-icons	App icons float around you

Light and background (26)

Type this	You get
/effects spotlight-neon	The spotlight plus a neon word behind you
/effects spotlight-pink	A pink neon spotlight
/effects spotlight-blue	A blue neon spotlight
/effects spotlight-soft	A softer spotlight, the room just dims
/effects blackout	Everything behind you goes black
/effects whiteout	Everything behind you fades to white
/effects portrait-mode	Blurs the room behind you like iPhone Portrait mode
/effects green-screen	Swaps your background for any picture
/effects color-backdrop	Your background turns one solid color
/effects gradient-backdrop	A smooth color gradient behind you
/effects studio	A clean grey studio backdrop with soft light
/effects golden-hour	Warm sunset light falls on you
/effects backlight	A bright light glows behind your head
/effects shadow-wall	Your shadow falls on the wall behind you
/effects color-pop	The room goes black and white, you stay in color
/effects dim-on-cue	The room dims the moment you say a word
/effects lights-off	The lights flick off around you, then back on
/effects flashlight	A flashlight beam follows you in the dark
/effects disco	Colored club lights sweep behind you
/effects sunset-sky	A sunset sky replaces your background
/effects starry-night	A night sky full of stars behind you
/effects window-light	Soft window light falls across you
/effects aura	A colored glow around your outline
/effects snow	Snow falls behind you
/effects rain-window	Rain runs down the window behind you
/effects fog	Fog rolls in behind you

Lists and words as you speak (30)

Type this	You get
/effects to-do-light	The checklist in light mode
/effects checklist-top	The checklist above your head
/effects steps	Numbered steps that tick off as you say them
/effects ingredients	A recipe card that checks off ingredients
/effects packing-list	A packing list that ticks off
/effects shopping-list	A shopping list that ticks off
/effects goals	Your goals tick off one by one
/effects agenda	Today's agenda, each point ticks as you cover it
/effects pros-cons	A pros and cons list fills in as you talk
/effects tier-list	Things drop into S, A, B, C rows as you rank them
/effects top-5	A top 5 list that counts down as you go
/effects scoreboard	A score goes up every time you make a point
/effects captions	Clean captions, word by word
/effects karaoke	Each word lights up as you say it
/effects bold-captions	Big bold captions, one word at a time
/effects captions-behind	Captions appear behind your head
/effects keyword-pop	Key words pop up next to you as you say them
/effects emoji-pop	Emojis pop in on the right words
/effects typewriter	Your words type out on screen as you say them
/effects quote-card	Your best line on a card at the end
/effects chapter-titles	A title card for each part of your video
/effects timestamps	A chapter timeline along the bottom
/effects question-box	An Instagram question sticker with your question
/effects poll-sticker	An Instagram poll sticker
/effects counter	A number counts up to your figure
/effects progress-bar	A progress bar along the top as the video plays
/effects subscribe	A subscribe button pops in and gets clicked
/effects follow-pop	A follow button with your name pops in
/effects comment-pop	A comment bubble pops in with a real comment
/effects receipt	A receipt prints out with your items and prices

Fast cuts and pages (22)

Type this	You get
/effects match-cut-fast	Even faster cuts between the pages
/effects match-cut-slow	Slower cuts, each page readable
/effects match-cut-end	The page cuts at the end of your clip
/effects news-flash	A few headlines flash between your sentences
/effects headline-stack	Headlines stack up around you
/effects brand-cut	A brand's pages with its name locked in place
/effects name-cut	Pages that mention your name, name locked
/effects wiki-cut	Wikipedia pages with the same word locked
/effects review-cut	Review pages with a product name locked
/effects recipe-cut	Recipe pages with one ingredient locked
/effects city-cut	Travel pages with a city name locked
/effects job-cut	Job posts with one job title locked
/effects word-cut	Any word you pick, locked across real pages
/effects photo-dump	Your photos flash fast before your clip
/effects zoom-cut	Snaps closer on you on key words
/effects jump-zoom	Punch in and out every sentence
/effects freeze-frame	Freezes on you with a label, then plays on
/effects rewind	Rewinds back to the start with VHS lines
/effects stutter	Your clip stutters on a key word
/effects mirror	A mirrored copy of you behind you
/effects clone	Three of you side by side
/effects whip-in	A whip pan with motion blur into your clip

iPhone-style screens (26)

Type this	You get
/effects apple-toggles-dark	The switches in dark mode
/effects toggles-black-and-white	A switch that turns your video black and white
/effects toggles-zoom	A switch that zooms in on you
/effects toggles-night	A switch that dims the room
/effects toggles-vivid	A switch that makes the colors pop
/effects toggles-warm-cool	Warm and cool switches that change your color
/effects toggles-custom	Your own switch labels
/effects control-center	An iPhone Control Center slides down over you
/effects dynamic-island	The Dynamic Island grows with your message
/effects imessage	iMessage bubbles pop up next to you
/effects lock-screen	Your video as an iPhone lock screen
/effects notification-stack	Notifications stack up next to you
/effects facetime	Your clip as a FaceTime call
/effects iphone-frame	Your video playing inside an iPhone
/effects airdrop	An AirDrop popup offering your video
/effects battery	A battery fills from 0 to 100%
/effects volume-slider	An iPhone volume slider rises
/effects brightness-slider	A slider that brightens your video
/effects slider-blur	A slider that blurs the room behind you
/effects app-store	An App Store card for your app
/effects siri	The Siri glow around the edges of your video
/effects screen-time	A Screen Time card with your numbers
/effects maps-pin	A Maps card with your location
/effects camera-ui	iPhone camera UI with a REC timer
/effects low-battery	The low battery warning pops up
/effects face-id	A Face ID scan on your face, then a check

Big text and titles (22)

Type this	You get
/effects text-behind	A huge word behind your head
/effects title-behind	Your video's title stacked behind you
/effects word-pop	One big word pops in front of you
/effects outline-text	Giant outlined text behind you
/effects stacked-title	The same word stacked many times behind you
/effects lower-third	Your name and title as a lower third
/effects newspaper-title	Your hook as a newspaper headline
/effects marquee	Text scrolling behind you like a ticker
/effects news-ticker	A breaking news bar at the bottom
/effects hook-box	A white box with your hook on top
/effects keyword-box	A red box around a key word on screen
/effects big-number	A huge number behind you
/effects stamp	A stamp slams onto the screen
/effects handwritten	A handwritten note scribbles on
/effects glitch-title	A glitchy title flickers on
/effects neon-title	A neon sign title above you
/effects chrome-title	A shiny chrome title
/effects gradient-title	A bright gradient title
/effects countdown-3-2-1	A 3, 2, 1 countdown before you start
/effects end-card	An end card with a follow button
/effects location-tag	A location tag with a pin
/effects date-stamp	An orange camcorder date stamp in the corner

Looks (22)

Type this	You get
/effects look-warm	A warm, golden grade
/effects look-cool	A cool, clean grade
/effects look-mono	Black and white
/effects look-noir	Hard black and white, film noir
/effects look-film	Soft film colors
/effects look-punch	Punchy contrast and color
/effects look-fade	A faded, matte look
/effects look-vintage	An old photo look
/effects look-vivid	Vivid, saturated color
/effects look-dream	A bright, dreamy look
/effects push-in	A slow push in on you
/effects vhs	Camcorder tape: lines, noise and a date
/effects film-grain	Real-looking film grain
/effects vignette	Dark soft edges around the frame
/effects letterbox	Black cinema bars top and bottom
/effects light-leak	Warm light leaks across the frame
/effects rgb-split	Red, green and blue split apart
/effects sepia-memory	An old memory with burned edges
/effects night-vision	Green night-vision camera
/effects thermal	A heat-camera look
/effects comic	A comic-book look with halftone dots
/effects polaroid	Your clip inside a Polaroid frame

Common Mistakes and Quick Fixes

If this happens	Try this
/effects doesn't show up	Start a new session after installing. Still nothing? Ask Claude: "Is the effects skill in my ~/.claude/skills folder?"
Claude can't find your video	Open Claude Code in the folder your video is in, or drag the video into the chat
Panels or cards cover your face instead of going behind you	Say yes when Claude offers to install the cut-out tool, then run the code again
The effect is in the wrong spot	Tell Claude where: "move the to-do list above my head"
It takes a long time	Use a shorter clip, or say which part: /effects orbit only from 0:03 to 0:08
The to-do list doesn't match what you say	Tell Claude the items and when you say them, or let it install the speech tool so it can listen
Match-cut skips a lot of pages	Some sites block it. Ask for more pages, or paste your own links
You want another version	Just ask: "do it again in dark mode", "make the word pink", "slower"

DO THIS TODAY

Install /effects with the one message on page 3, film a 10-second clip of you talking, and type /effects spotlight. Then try the other five.
