CHATGPT IMAGE CODES

200 IMAGE AND VIDEO SHORTCUTS

Type /headshot and ChatGPT makes you a professional headshot. Type /productexplosion and your product splits into 3D parts. Type /ugc and you get a real UGC video. The 6 from the video are up top, then 194 more that turn one word into a finished image or video.

The 6 codes from the video

194 brand-new ones, none repeated from my other code lists

Headshots, product shots, ads, logos, mockups, social graphics

16 video codes that run through the Higgsfield plugin

The 2-minute Higgsfield setup that makes every code come out cleaner

2026 Edition

How To Use These

Type the code, attach your photo or product shot (or just describe it), and hit enter. For example: **/headshot** with a selfie attached, or **/productshot** with a photo of your product, or **/logoconcepts** followed by your brand name. That's the whole trick. Add one line of detail if you want it a specific way ("**/staticad** for my coffee brand, dark green, headline: Wake Up Better").

Image codes give you a picture back in the chat. The video codes at the end give you a clip. And you can keep going after any of them: "same thing but wider," "swap the background," "make three versions."

Connect Higgsfield First (My Recommendation)

You can run every code below in plain ChatGPT. But I'd connect the Higgsfield plugin before you start. Higgsfield gives ChatGPT access to all the different image and video models (Nano Banana Pro, GPT Image 2, Seedream, Kling 3, Seedance 2.5 and more), and each one is good at a different kind of job: one is best for faces, one for product renders, one for text on packaging, one for video. Once it's connected, ChatGPT automatically tells Higgsfield which model fits the code you typed, so you never have to pick. The results come out much cleaner than asking ChatGPT to draw them by itself, and the video codes need it.

GET HIGGSFIELD (FREE TRIAL)

Start here: higgsfield.ai ([free trial for new users](https://higgsfield.ai)). You need a Higgsfield account to connect the plugin, and generations use Higgsfield credits, so start the trial first. If you're only testing, cancel the auto-renewal inside Higgsfield.

Here's how to connect it

STEP 1: Add the plugin

Go to higgsfield.ai/mcp and click **Add Higgsfield plugin**. Or, inside ChatGPT, open the plugins directory, search **Higgsfield**, and click **Add**. It's an official listing, so there's no link to paste and no API key.

STEP 2: Sign in and authorize

A Higgsfield window opens. Sign in to your Higgsfield account and click **Authorize**. That's the whole connection.

STEP 3: Turn it on and test it

In a new chat, open the tools menu next to the message box and make sure Higgsfield is on. Then type your first code: **/headshot** with a selfie attached. If an image comes back, you're set. From here, every code in this list routes through the best model for the job automatically.

HEADS UP

If it says "authorization failed," go to ChatGPT Settings, then Plugins, then Higgsfield, and reconnect. If images work but video doesn't, your trial or plan is out of credits. Video is the expensive part.

TIP

Stack the codes: `/productshot` for the clean photo, `/colorways` to see six colors, `/staticad` to build the ad around the winner, then `/productreel` to turn it into the video. Four words, a full launch kit.

The 200 Codes

The 6 From The Video

<code>/headshot</code>	A professional LinkedIn-ready headshot from your selfie	<code>/ugc</code>	A high-quality UGC video of your product (Higgsfield)
<code>/productexplosion</code>	Your product in 3D with every part expanded outward	<code>/productspin</code>	A dynamic 360 spin video of your product (Higgsfield)
<code>/adcreative</code>	A full advertisement built around your product	<code>/animated</code>	Animates your product into a cool visual (Higgsfield)

Headshots & Portraits

<code>/corporateheadshot</code>	Studio headshot on a neutral grey, suit and tie	<code>/passportphoto</code>	Compliant passport photo: white wall, even light
<code>/casualheadshot</code>	Relaxed headshot with soft natural window light	<code>/graduationportrait</code>	Cap and gown portrait with a campus backdrop
<code>/founderportrait</code>	Editorial founder portrait for a press feature	<code>/actorheadshot</code>	Casting-style headshot with clean eye contact
<code>/teamphoto</code>	A matching headshot style for your whole team	<code>/doctorportrait</code>	White coat clinic portrait, calm and trustworthy
<code>/bwportrait</code>	Timeless black and white portrait, film grain	<code>/realtorheadshot</code>	Realtor headshot with a bright home behind you
<code>/goldenhourportrait</code>	Outdoor portrait lit by warm golden hour sun	<code>/fitnessportrait</code>	Gym portrait with dramatic side lighting
<code>/speakerphoto</code>	You on a conference stage, spotlight and crowd	<code>/podcastportrait</code>	Mic-in-frame portrait for your show cover
<code>/authorphoto</code>	Book-jacket author portrait, thoughtful and warm	<code>/vintageportrait</code>	You shot in a 1970s film photo style
<code>/datingprofile</code>	A flattering, natural profile photo that looks real	<code>/outfitswap</code>	Same headshot, five different outfits to pick from

Product Photography

/productshot	Clean studio product photo on seamless white	/ghostmannequin	Ecommerce ghost-mannequin shot of clothing
/lifestyleshot	Your product in use in a real, styled scene	/handheld	Your product held in a hand for scale
