Each code below changes how Claude responds by forcing
a specific mode, format, or reasoning pattern.

Writing & Style

/proofread

Catches every grammar mistake, awkward phrase, and clarity issue and fixes them all in one pass.

/natural

Rewrites the response so it reads like a real person talking, not a machine.

/direct

Strips all hedging language and gets straight to the point immediately.

/reword

Says the exact same thing using completely different words.

TONE

Shifts the voice of the entire response to match any mood you describe.

/clean

Removes all clutter and formatting noise leaving only clear readable text.

/structure

Reorganizes messy content into a logical order that actually makes sense.

/punchup

Makes flat boring writing hit harder without changing the meaning.

READABLE

Adjusts sentence length and paragraph breaks so the text is effortless to read.

/precision

Replaces every vague word with a specific one so nothing is left to interpretation.

Output Control

TABLE

Takes any messy information and formats it into a clean side-by-side comparison table so you can decide instantly.

V2

Rewrites its own answer tighter, sharper, and higher quality than the first.

NUMBERED

Converts the entire response into a clean numbered list.

ONEPAGE

Compresses the entire answer to fit on a single page no matter how complex the topic is.

/sort

Organizes any list by the criteria that actually matters most to you.

/split

Breaks one long response into clearly labeled sections you can scan fast.

VISUAL

Formats the response with headers, spacing, and structure designed for quick scanning.

/density

Packs maximum information into minimum words with zero fluff.

BRIEF

Limits the entire response to five sentences maximum.

/format

Restructures the output into whatever exact format you specify.

Idea Generation

/brainstorm

Stops giving you one safe answer and floods you with a massive batch of ideas you'd never think of.

WHATIF

Explores hypothetical scenarios and outcomes you have not considered yet.

/mashup

Smashes two unrelated concepts together to create something completely original.

WILDCARD

Throws in one completely unexpected idea that breaks the entire pattern.

/riff

Takes one single idea and spins off ten different variations of it.

OPPOSITE

Looks at what everyone else is doing and suggests the exact reverse approach.

/stolen

Borrows a proven strategy from a completely different industry and applies it to yours.

RANDOM

Introduces a random creative constraint to force unusual thinking.

/pivot

Takes a failing idea and finds the one change that could save it.

SPARKS

Generates a rapid fire list of raw unfiltered idea fragments to build from.

Planning & Execution

/checklist

Turns any plan or strategy into a step-by-step actionable checklist you can follow immediately.

ROADMAP

Creates a phased plan with clear milestones from start to finish.

SPRINT

Breaks a big goal into a focused one-week action plan you can start today.

/dependencies

Shows which tasks must happen before others can start so nothing stalls.

LAUNCH

Builds a complete launch plan from preparation to go-live with nothing missed.

/blockers

Identifies everything that could stall progress before it actually happens.

GAMEPLAN

Creates a full reusable game plan for any repeatable process.

/sequence

Puts every step in the exact right order so nothing gets done out of turn.

MILESTONE

Breaks a large goal into smaller checkpoints so you can track progress along the way.

90DAY

Builds a full 90-day strategic plan with weekly targets and measurable outcomes.

Critical Thinking

/question

Responds with the ten most important questions you should be asking instead of giving you an answer.

STRESS

Pressure tests your idea under worst-case conditions to see if it survives.

HOLES

Finds every gap and weak point in your logic or argument.

/challenge

Pushes back on your thinking and forces you to defend your position.

SKEPTIC

Responds like someone who does not believe a word you just said.

/pressure

Applies increasing levels of scrutiny until the idea either holds or breaks.

BIAS

Identifies which cognitive biases might be influencing your decision right now.

/dissect

Takes an argument apart piece by piece and evaluates each one individually.

SANITY

Runs a quick sanity check on whether your plan makes basic logical sense.

WEAKEST

Finds the single weakest link in your entire plan and puts a spotlight on it.

Communication & Influence

/position

Restructures your message so you enter any conversation from a place of strength.

HOOKLINE

Writes an opening line so strong it makes someone stop scrolling immediately.

/defuse

Rewrites a tense message to remove the tension while keeping the point intact.

AUTHORITY

Restructures your message so you sound like the undeniable expert in the room.

/soften

Takes a harsh message and makes it firm but respectful without losing the edge.

URGENCY

Rewrites the message so the reader feels they need to act right now.

/diplomatic

Makes a blunt or controversial point sound reasonable and measured.

RAPPORT

Rewrites a cold message to build genuine connection and trust with the reader.

/boundary

Helps you say no firmly and clearly without damaging the relationship.

CLARITY

Rewrites confusing communication so the meaning is impossible to misread.

Learning & Understanding

/tutor

Teaches a topic through back-and-forth questions adapted to your exact level.

ANALOGY

Explains any concept by comparing it to something you already understand perfectly.

/quiz

Creates practice questions to test if you actually learned the material or just read it.

CHEATSHEET

Compresses an entire topic into a one-page quick reference you can save.

/walkthrough

Guides you through a process one step at a time with clear explanations at each stage.

GLOSSARY

Defines every technical term used in the response in plain simple language.

/foundations

Teaches the prerequisite knowledge you need before you can tackle the real topic.

MISTAKES

Lists the most common mistakes people make with a topic so you can avoid every one of them.

/demystify

Takes a topic that sounds intimidating and makes it feel completely approachable.

PRACTICAL

Skips all theory and only teaches the parts you will actually use in real life.

Data & Research

/evidence

Backs up every single claim with data, studies, or real-world examples.

PATTERN

Finds the hidden patterns in any set of information that are not immediately obvious.

/contrast

Highlights the key differences between two or more options so the choice is clear.

ANOMALY

Spots the one thing in the data that does not fit the pattern and explains why it matters.

/correlate

Identifies what variables are moving together and what that actually means.

INVENTORY

Lists every piece of relevant information before drawing any conclusion.

/quantify

Puts real numbers on things that are usually described vaguely.

MEASURE

Defines exactly how to measure success or failure for any goal or project.

/sample

Finds real-world examples and case studies to support or challenge any claim.

TREND

Identifies the direction things are moving and what it means for you specifically.

Business & Strategy

NICHE

Identifies the most specific winnable market position available to you.

/scale

Shows how to take something working small and make it work at ten times the size.

ECOSYSTEM

Maps all the players, relationships, and forces operating in any market.

/differentiate

Finds the one thing that makes you impossible to copy or replace.

ECONOMICS

Breaks down the real cost and profit math behind any business decision.

/expansion

Identifies the next logical market, product, or audience to go after.

CHURN

Diagnoses exactly why people are leaving and what specific change would make them stay.

/lean

Strips a plan down to the leanest version that still actually works.

DEFENSIBLE

Identifies what would stop a competitor from copying your exact playbook.

DISTRIBUTION

Finds the best channels to reach your audience with the least effort and cost.

Advanced Modes

/reason

Shows every step of the thinking process before arriving at the final answer.

MAXDEPTH

Pushes the response to the absolute deepest level of analysis possible.

/custom

Creates a set of instructions that changes how Claude responds for the rest of the conversation.

/embody

Makes Claude respond as a specific type of person with their exact mindset and expertise.

/multi

Gives the same answer from three different expert perspectives side by side.

/iterate

Automatically improves the response three times before showing you the final version.

MAXEFFORT

Treats the response as the most important answer it will ever give.

/strict

Follows your instructions exactly with zero creative liberty or improvisation.

/freeform

Ignores all default formatting and responds however feels most natural.

/evolve

Takes any response and makes it progressively better across three automatic versions.
